

## Reception Summer Learning

We started off our summer term with a fabulous trip to Conkers where we undertook such exciting activities as the Barefoot Walk and Mother Nature Designer. Everybody enjoyed feeling various sensations under their feet and an interesting new addition to their Learning Journey!

After this trip we enjoyed our *Let's Get Growing* and *Marvellous Minibeasts* topics.

Most of the Reception children can now tell you what plants need to grow, planted their own seeds and learnt to take care of our garden.

We also found out that most insects have six legs, but those with eight are called arachnids!

We even found tadpoles in the school garden!

Chloe brought her caterpillar in from home and we watched her become a butterfly and then let her go.
