

## Parent and child's guide to using MyMaths.

### How to access MyMaths

We recommend using MyMaths on a desktop PC, laptop or tablet to get the best experience.

Go to **www.mymaths.co.uk** and login at the top of the page with the school's username and password.

School Login: **woodlands6**

Password: **angles103**

You will need the above school user info and password and your child's individual info for your first login attempt.

On the next page your child should enter their personal username and password in the My Portal box.

The screenshot shows the MyMaths user interface. At the top, there is a navigation bar with 'Log out', 'Help', and 'Assessment Manager' links, and a search box. Below this, there is a 'Select Curriculum' section with a dropdown menu set to 'National Curriculum (Eng)'. A sidebar on the left contains a 'Library' section with a 'Latest' tab selected, and a list of subjects: Number, Measurement, Geometry, and Statistics. The main content area is titled 'Latest' and displays a list of resources. The first resource is 'KS2 SATs booster' with a right arrow. Below it are 'Bar model', 'Number', 'Measurement', 'Geometry', and 'Statistics'. To the right of this list, there are three assessment cards for Year 6: 'Arithmetic assessment 1' (with a 'Worksheet' button), 'Arithmetic assessment 2', 'Mixed assessment 1', and 'Mixed assessment 2'. A modal box is open on the right side, titled 'My portal username'. It has a close button (X) in the top right corner. The modal contains two input fields: 'Username' and 'Password'. Below the password field is a question mark icon and a 'Log in' button. At the bottom of the modal, there is a link that says 'Assessment Manager log in'. A red arrow points from the text above to the 'My portal username' label in the modal.

MyMaths will then remember who they are and automatically log them in to the tasks. You should have received your login details via text message by Monday 4<sup>th</sup> May.

Once your child has logged in they will see this screen.

They can choose to practice topics they feel less confident in (practice tab), they can see a record of their scores (scores tab), play fun games (games tab) or complete the online home learning their teacher has set (Homework tab). If there is nothing showing under the homework tab, then your child's teacher has not set their home learning yet. They can still access the games and practice sections though.

The homework tab is where the work set by your child's class teacher will be available. Once you select this, their online home learning will be displayed.

## Completing your homework

You can see tasks your teacher has set in the Homework area. If you click on one of the tasks, you will have the option to revise from the lesson first or go straight to the homework. We recommend that your child works through the lesson and then starts the homework as the lesson will gradually develop your child's understanding and prepare them for the homework task.

Each homework has 2 pages of questions. You must press the Mark it button on both pages to complete the task.

If you want to save your work to complete later, you can press the Save button. This will save your work for 2 weeks.

You can try each task as many times as you like. Only your best score for each page of questions will be recorded. Your teacher will be able to see how well you did and when you completed the task.

Q1

- If a green star appears next to a topic, they have good skills in that area.
- If an amber star appears they still have some difficulties.
- If a red star appears they need to go back and relearn the topic. Get them to try the lesson again or ask their teacher for extra help. If you want to work with your child, an effective strategy is to pretend that you have forgotten how to do something and ask them to show you how. Putting your child in the position of "teacher" is good for their confidence and gets them to talk about their thinking.

You can see your completed tasks and how you're getting on in the Results area. You can also tell your teacher what you thought of each task by giving it a Rating.

If you have any questions on using MyMaths at home, visit our dedicated support site. You can access this at any time by clicking Help at the top of the screen or by visiting <https://support.mymaths.co.uk/>

### **Having trouble accessing MyMaths?**

If no links are working, it may be that you have a Pop Up Blocker. You will need to allow MyMaths to use Pop Ups and we suggest that you add [www.mymaths.co.uk](http://www.mymaths.co.uk) to your list of trusted sites.

If you are having trouble accessing content, it may be that you need to activate Flash in your browser. You can find more information on this in the technical section of our support site by clicking Help at the top of the screen after you've logged in.
