## BREACH MANAGEMENT PROCEDURE

### What is a Breach?

A Breach of the Data Protection Act 2018 or UKGDPR is where personal data has been accidentally, or unlawfully processed. This may include where an individual's personal data has been:

- Lost
- Stolen
- Destroyed
- Altered
- Disclosed or made available where it should not have been
- Made available to unauthorised people

### What will happen next?

- On finding or causing a breach, or a potential breach, staff must immediately notify the Data Protection Officer via email at [DPO@woodlands.walsall.sch.uk](mailto:DPO@woodlands.walsall.sch.uk). The Headteacher should also be copied into this email unless the disclosure is potentially a confidential whistleblowing matter.
- The school assisted by the DPO will investigate the issue, and determine whether a breach has occurred.
- The school will make all reasonable efforts to contain and minimise the impact of the breach, assisted by the DPO, relevant staff members or data processors where necessary. (Actions relevant to specific data types are set out at the end of this procedure)
- The DPO will assess the potential consequences, based on how serious they are (impact on individuals), and how likely they are to happen.
- The DPO in conjunction with the Headteacher will determine whether the breach must be reported to the ICO. This must be judged on a case-by-case basis. To decide, the DPO and relevant school will consider whether the breach is likely to negatively affect people's rights and freedoms, and cause them any physical, material or non-material damage (e.g. emotional distress), including through:

- Loss of control over their data
  - Discrimination
  - Identify theft or fraud
  - Financial loss
  - Unauthorised reversal of pseudonymisation (for example, key-coding)
  - Damage to reputation
  - Loss of confidentiality
  - Any other significant economic or social disadvantage to the individual(s) concerned
- If it's likely that there will be a risk to people's rights and freedoms, the breach should be reported to the ICO by the DPO.
  - The DPO will document the decision (either way), in case it is challenged at a later date by the ICO or an individual affected by the breach. Documented decisions will be stored as part of the relevant IAR and risk register.
  - Where the ICO must be notified, the DPO will do this within 72 hours. As required, the DPO will set out:
    - A description of the nature of the personal data breach including, where possible:
      - The categories and approximate number of individuals concerned
      - The categories and approximate number of personal data records concerned
    - The contact details of the DPO
    - A description of the likely consequences of the personal data breach
    - A description of the measures that have been, or will be taken, to deal with the breach and mitigate any possible adverse effects on the individual(s) concerned.
  - If all the above details are not yet known, the DPO will report as much as they can within 72 hours. The report will explain that there is a delay, the reasons why, and when the DPO expects to have further information. The DPO will submit the remaining information as soon as possible.
  - The DPO and relevant staff from school will also assess the risk to individuals, again based on the severity and likelihood of potential or actual impact. If the risk is high, the DPO will assist the school in the process of informing, in writing, all individuals whose personal data has been breached. This notification will set out:
    - The contact details of the DPO
    - A description of the likely consequences of the personal data breach
    - A description of the measures that have been, or will be, taken to deal with the data breach and mitigate any possible adverse effects on the individual(s) concerned.
  - The school will notify any relevant third parties who can help mitigate the loss to individuals – for example, the police, insurers, banks or credit card companies.

- The DPO will document each breach, irrespective of whether it is reported to the ICO. For each breach, this record will include the:
  - Facts and cause
  - Effects
  - Action taken to contain it and ensure it does not happen again (such as establishing more robust processes or providing further training for individuals)
  - Records of all breaches will be stored on the school's Information Asset Register.
- In the case of a reportable breach, the DPO, Headteacher and Finance Operations Assistant will meet to review what happened and how it can be stopped from happening again. This meeting will happen as soon as reasonably possible. In these circumstances, the Headteacher will be responsible for sharing this information to the Chair of Governors.
- The DPO will support the Trust Board with advice and recommendations, so that lessons can be learnt and appropriate interventions or training put in place.

### **Actions to minimise the impact of data breaches**

We will take the actions set out below to mitigate the impact of different types of data breach, focusing especially on breaches involving particularly risky or sensitive information. We will review the effectiveness of these actions and amend them as necessary after any data breach.

**In all cases breaches or suspected breaches should be reported as a matter of urgency to the DPO: [DPO@woodlands.walsall.sch.uk](mailto:DPO@woodlands.walsall.sch.uk)**

### **Sensitive information being disclosed via email (including safeguarding records)**

- If special category data (sensitive information) is accidentally made available via email to unauthorised individuals, the sender must attempt to recall the email as soon as they become aware of the error
- Members of staff who receive personal data sent in error must alert the sender and the DPO as soon as they become aware of the error
- The school will ensure we receive a written response from all the individuals who received the data, confirming that they have complied with this request

### **Sensitive information being disclosed via post**

- If personal data is accidentally made available to unauthorised individuals by post, the sender must contact the unintended recipient and ask that they return any documents to school. This may require staff to visit an address to retrieve documents where the information disclosed is special category data (sensitive information)

- Where it is not possible to retrieve special category personal data (if it has been destroyed by the recipient) the school should request that the recipient confirms this is the case and no copies have been made or retained.

**Personal Data lost or stolen on removable storage devices (e.g. USB keys, hard-drives, digital cameras, tablet computers, laptops)**

- Where devices storing electronic records that include personal data are lost or stolen, then staff should make an immediate assessment of the documents that may have been lost.
- The member of staff should confirm as a matter of urgency whether the device was encrypted and whether any documents lost may contain special categories of personal data.
